PROUD TO WEAR GROUPE ATLANTIC COLOURS

GROUPE ATLANTIC meets vital needs through its increasingly eco-efficient solutions for heating, sanitary hot water, air conditioning and air treatment, which are geared to millions of customers in the housing and tertiary markets.

A French company operating on four continents, GROUPE ATLANTIC upholds strong family values: trust, responsibility and long-term commitment.

GROUPE ATLANTIC 2020 key figures: 10 300 employees; 28 industrial sites; €2.2 bn net turnover.

Thermal comfort is life / Thermal comfort for all

Worldwide expert in thermal comfort solutions

atlantic

Atlantic is a **multi-energy brand** manufacturing heating, water heating and ventilation solutions for residential and commercial markets across the globe. It aims at constantly **strengthening its customers' satisfaction** by increasing and **improving its product portfolio**, as well as **getting closer to its customers**.

To this end, Atlantic has succeeded in improving and completing its water heating solutions to comply with new European environmental standards, and offers a coherent **range of water heaters**. It also keeps focusing its **R&D investments** on developing new **eco-friendly solutions for heating and water heating**.

With this new extended and improved offer, customers benefit from Atlantic's latest technologies and energy-saving solutions.

Atlantic guides you through ErP regulations

WHAT IS ErP?

ErP stands for Energy-related Products. The ErP European policy consists of two directives: eco-design and energy labeling. It aims to improve energy efficiency and performance standards of the following products >

WATER HEATERS

HEAT PUMPS

ELECTRIC PANEL HEATERS

BATHROOM RADIATORS

ECO-DESIGN

Ecodesign defines the acceptable energy efficiency levels, as well as environmental criteria for energy-related products. Therefore, heating and water heating products must comply with all Ecodesign requirements in order to get the CE mark and be sold within the European Union market.

ENERGY LABELLING

Energy Labelling provides information about the environmental impact of the product. It creates much more transparency for customers and helps them to make the right choice by taking into consideration specific information about the products (energy consumption, noise level, etc).

Atlantic is an expert in heating and water heating, with efficient and eco-friendly solutions. It owns several exclusive patented technologies and actively supports ErP regulations.

WHAT ARE THE BENEFITS?

Atlantic not only makes ErP-compliant products, but also wants to make sure that its end users and partners have a complete understanding of the Ecodesign directive's challenging goals.

Benefits for end users:

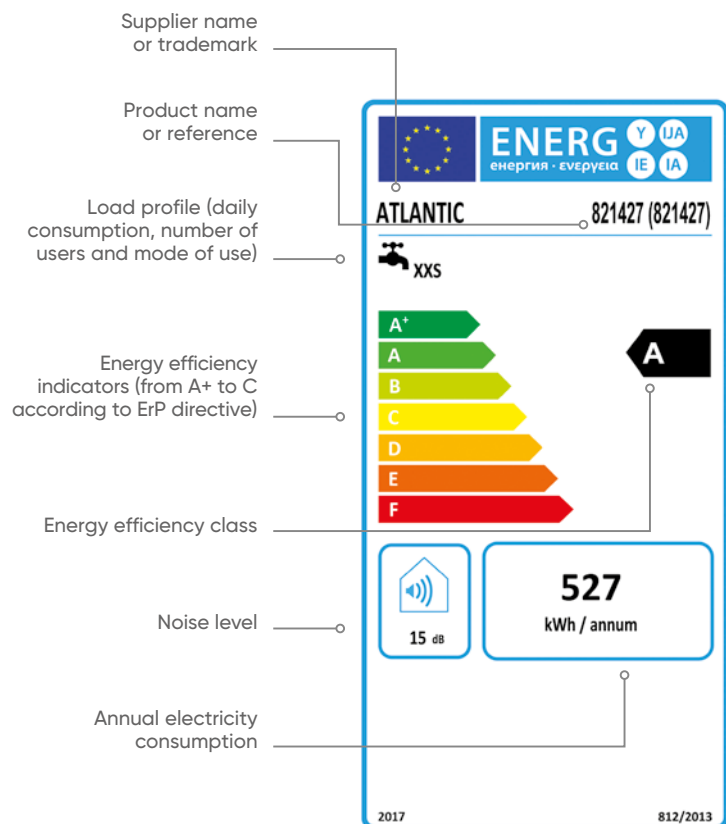

- Increased long-term energy efficiency allowing energy and money savings
- Contribution to environmental protection due to reduced greenhouse gas emissions
- Easier product choice due to energy information transparency
- Removal of inefficient and polluting products from the market

Benefits for partners:

- Professional expertise reinforced with high-quality and environmentally friendly products
- Fruitful partnership with an innovative company constantly improving the energy efficiency of its products
- Association with a renowned French brand that is continuously expanding worldwide
- Full support and guidance in customer relation management regarding low-energy products

HOW TO READ A PRODUCT LABEL

The product label is provided by the manufacturer. In the European Union, the end user's contact (distributor or installer) is responsible for providing visibility and comprehension of the ErP label content.

Connectivity and remote control

> As a renowned expert in thermal comfort, Atlantic puts considerable effort into developing innovative solutions. **That's why connectivity will be at the centre of our vision for many years to come.**

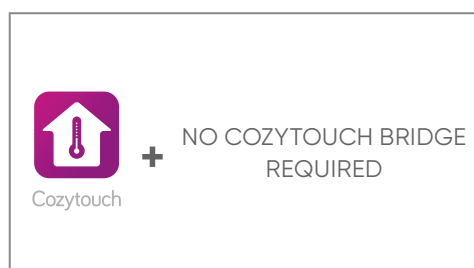

Atlantic has developed the Cozytouch application to enable you to connect to and control your appliance wherever you are and whenever you want.

The Cozytouch application is connected to 2 types of protocols, depending on products:

WI-FI CONNECTIVITY (IP)

Wi-Fi connectivity is Atlantic's latest innovation, enabling you to connect water heaters and room heaters directly to Wi-Fi with ease. Wi-Fi is an internet protocol (IP) which enables direct connectivity with your internet box. Once connected, the device can be controlled remotely via the Cozytouch application.

IO-HOMECONTROL

IO-Homecontrol is home automation controlling heating, water heating or ventilation remotely through a smartphone or a tablet via the Cozytouch application. It allows the devices to communicate with each other using the IO-Homecontrol radio protocol.

IO-Homecontrol needs to be connected to a Cozytouch bridge (sold separately).

COZYTOUCH

Revolutionising connected comfort

Atlantic is proud to present its new range of connected products.

Steatite Cube Wi-Fi Vertigo Steatite Wi-Fi

ELECTRIC WATER HEATERS

Calypso VM Calypso Split Inverter Explorer

HEAT PUMP WATER HEATERS

Altis Ecoboost Wi-Fi Solius Wi-Fi Agilia IO Orinis Smart Pilot IO

ROOM HEATING

Adelis Sensium

BATHROOM HEATING

WITH THE COZYTOUCH APPLICATION YOU CAN :

- **CONTROL** all your devices on the same screen
- **TAILOR YOUR HOME COMFORT** to your needs
- **PROGRAM** your devices remotely
- **SWITCH OFF** appliances when you are out
- **VIEW AND ANALYZE** your energy savings

Discover our services and training sessions

> As a service provider, we strive to bring you peace of mind every day. Atlantic offers exclusive services along with its products.

PRACTICAL TRAINING

Useful training programs for your everyday work to help you be more efficient.

AFTER SALES SERVICE

Handling of spare parts, technical assistance and warranty management, set-up support (testing installation to ensure appliances are in full working order, adjusting required gauge or flow rates).

WHY ENROL IN A TRAINING PROGRAM?

Save time

- Working equipment
- Hands-on practical training in small groups
- Test benches and failure simulations
- Expert trainers with extensive field experience

Get a qualification

Training sessions on-site or in our training centres in France. Train on working equipment to develop your expertise and your business.

Diagnosis assistance

For all technical assistance, installation, commissioning information, fault diagnosis and repairs, contact our technical support with your serial number + product model code. You can also share the diagnosis with an expert at our French industrial site either by email or video conference.

support-rdhw@groupe-atlantic.com

Warranty expertise

Warranties are handled according to incident tickets. If required, on-site or laboratory expertise is available. Once the part is replaced, you can then return the defective part. As a result, you will help us to constantly improve our products!

spareparts-rdhw@groupe-atlantic.com

3 training centers

- 1 Orléans (south of Paris) - one of the manufacturing sites for electric heating
- 2 Meyzieu (east of Lyon)
- 3 Nancy (east of Paris)

How to register and plan your training?

tpradines@groupe-atlantic.com

> "For all my repairs, I choose original parts certified by Atlantic!"

Reliability

Parts certified and approved by our factories

Durability

Certified parts ensure the appliance runs smoothly and are covered by the manufacturer's guarantee

Peace of mind

Parts stocked for at least 10 years

TRAINING DETAILS

On-site trainings

- **ESE 6-01 (One day)** : Heat Pump Water Heater - "Choose the right cylinder"

Online trainings

- **ESE 6-05 (One hour)** : Basics of Heat Pump Water Heater

PURPOSE

At the end of this online training, you will be able to describe the basics of heat pump water heater

CONTENT

- Technical basics
- Various configurations
- Installation best practices
- How to underline the importance of maintenance operations

METHODS AND TEACHING MEANS

Direct exchanges with a trainer thanks to video conference

Choosing the right domestic hot water appliance

4 MAIN ADVANTAGES of Atlantic water heaters

1

DURABILITY

High quality of the water heater and its components: long-lasting protection of the tank to prevent limescale and rust thanks to quality enamelling

2

EFFICIENCY

Continuous access to hot water at the required temperature thanks to fast heating functions and accurate regulation

3

ENERGY SAVINGS

Energy savings achieved through Smart functions, optimised water heating control and efficient insulation

4

COMFORT

Available hot water at a constant temperature at every moment is the assurance of a well-being in your everyday life. Atlantic helps to improve the thermal comfort according to your needs.

The water heater is a vital part of your home, providing hot water for your needs. Choosing the right appliance will ensure you not only have a steady supply of water but also that you will benefit from energy and cost savings. Several factors should be taken into account in making your selection:

ESTIMATING HOT WATER REQUIREMENTS

The required water heater model depends on the daily hot water consumption, number of drainage points and number of people in the household.

No. users	Models (L)	Equipment
	10-30	 or 
	50	 + 
	80+120	 +  + 
	150+500	 +  +  + 

IMPORTANCE OF WATER QUALITY

Water is a chemical agent charged with positive and negative ions. When the number of ions is balanced, the water charge is neutral. However, depending on regions the water supply isn't always balanced. Aggressive, highly mineralised and desalinated water can reduce the water heater's performance and lifetime. Atlantic offers the widest range of appliances so that the customer can make the right choice.

AGGRESSIVE WATER

causes a lot of corrosion

BALANCED WATER

causes corrosion and limescale

HARD WATER

causes a lot of limescale

SAFE INSTALLATION

Atlantic water heaters have a high protection level against splashing water (IP index up to IP 25) and guarantee safe operation.

Thus, Atlantic products can be installed in areas 0, 1 and/or 2 of the bathroom depending on country regulations.

Atlantic technologies

► Atlantic develops exclusive patented technologies to achieve long-lasting functionality for day-to-day use along with optimal efficiency and savings.

1

PROTECTION AND INSULATION

Atlantic guarantees the best tank protection and insulation of all its products thanks to :

+ GLASS-LINED TANK & WELDING

A spotless enamelled tank is a fundamental component of the overall quality and functioning of an Atlantic water heater. The "diamond-quality" Label defines our high resistance enamel. It guarantees your hot water tank a long service lifetime without failure.

+ DOUBLE LIP GASKET

Unprotected steel parts in contact with water are the weakest parts of all water heaters, most leakages originate from there. Atlantic uses a unique double lip gasket, ensuring no contact between the steel tank edge and water.

+ HIGH-DENSITY PU FOAM

The polyurethane foam insulation prevents thermal bridges and helps to maintain water at the set temperature for a longer period of time. Atlantic foam contains 0% CFC and its high density reduces heat loss.

2

HIGH-PRECISION CONTROLS

Atlantic water heating appliances work with two main types of thermostats:

+ MECHANICAL THERMOSTAT

Combines control and overheat protection function with manual reset capability.

ROD THERMOSTAT

Manual temperature control through internal/external settings

BULB THERMOSTAT

Manual temperature control with multiple knob options

+ Greater precision

+ ELECTRONIC THERMOSTAT

Precision temperature control through digital control panel

- + Temperature control accuracy
- + Energy savings thanks to smart functions adapting hot water production to consumer habits.

3

HEATING ELEMENTS

+ DIRECT IMMERSION HEATING ELEMENT: AN APPROVED SOLUTION

The sheathed heating element is made from copper or stainless steel. It offers :

- + High-level performance thanks to its balanced charge
- + Fast heating

+ CERAMIC DRY HEATING ELEMENT WITH UNIQUE STEATITE TECHNOLOGY

Steatite
TECHNOLOGY

The Steatite heating element is protected by an enamelled steel sleeve and has no direct contact with water. Its advantages :

- + Large heat exchange surface which reduces limescale and heating noise
- + Well-adapted to all kinds of water (aggressive, highly mineralised and desalinated water)
- + Easy maintenance :
heating element removable
without draining the tank

4

ANTI-CORROSIVE PROTECTION

+ TRADITIONAL MAGNESIUM ANODE

The magnesium anode is located in the center of the enamelled tank.

- + Excellent protection against corrosion
- + Good protection for balanced water

+ EXCLUSIVE O'PRO TECHNOLOGY

Passive electronic anti-corrosive system

O'Pro technology uses an ohmic resistor. It balances out the electric resistance of both the tank and the heating element. Consequently, the magnesium anode focuses on protecting the tank lining and the heating element together.

- + Anode lifetime increased by 50%
- + Greater anti-corrosive tank protection
- + Perfect solution for balanced waters and aggressive water (generating corrosion)

+ PATENTED ACI HYBRID SYSTEM

State-of-the-art cathodic protection with titanium anode

This technology is simply the ultimate generation of electronic anti-corrosion tank protection for your DHW (Domestic Hot Water) production equipment. The titanium anode located at the centre of the appliance is driven by an electronic PCB board that produces a millivoltage electric current sent to the water, providing the tank with a lifetime protection.

- + ACI hybrid adjusts automatically its functioning to the variations in water quality
- + Lasts up to twice as long and requires less maintenance
- + Extended lifetime protection, replacing the magnesium anode
- + A control light which indicates that it is operational

Electric water heaters

High-end or basic models, large volume or space-saving designs, smart technology or standard features... Atlantic offers a wide range of electric water heaters, allowing you to meet the needs of even the most demanding customers.

O'Pro Small & O'Pro Slim

Compact & user-friendly water heater to fit in small spaces with above & under sink configurations

ELECTRIC WATER HEATER

MODELS 10 TO 15

(Vertical wall-mounted above and under sink)

MODELS 30 TO 50

(Slim vertical wall-mounted)

+ COMFORT

- Dedicated solution for direct hot water availability

+ DURABILITY

- Long tank life thanks to O'Pro exclusive anti-corrosive protection
- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

Installation options:

- 10 & 15L: above & under sink mounting models
- 30 & 50L: small diameter (338mm) water heater with above sink configuration

Safe operation:

- IP 25 (above sink models) and IP24 (under sink models) – full compliance with European standards for electric safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Control knob on the bottom (above sink models) and on the top (under sink models)
- Heating light indicator

O'PRO SMALL UNDER SINK

O'PRO SMALL ABOVE SINK & O'PRO SLIM

EXCLUSIVE ANTI-CORROSIVE SYSTEM

O'Pro technology uses an ohmic resistor to balance out the electric potential of both the tank and the heating element. This extends the life of the magnesium anode as well as increasing protection against corrosion.

DESIGN, COMFORT & QUALITY

Nanto, the new square water heater by Atlantic

COMPACT size, optimal for small spaces (bathroom, cupboard, kitchen cabinet)

ELEGANT & MODERN lines for smooth integration into any room - no need for concealment

DURABLE, using all of Atlantic's expertise in water heaters to provide the best performance over time

EASY TO INSTALL for professionals or end-users thanks to an improved wall fixing system and a stand-alone design, allowing it to remain stable on the floor (under sink models)

ENERGY SAVINGS with Eco position and Absence mode, providing the perfect balance between comfort and longevity

INTUITIVE USER INTERFACE with heating & shower ready lights

In addition to the basic features, Nanto comes with a range of options, offering even more benefits to the end-user:

- Display of temperature or quantity of hot water available
- Eco+ self learning mode to adapt heating according to daily habits

NANTO wins the prestigious Red Dot Award

reddot winner 2021

What is the Red Dot Award?

The "Red Dot" is the award for high design quality. The international jury only awards this sought-after seal of quality to products that feature outstanding design.

Nanto

Nanto Max

"With its compact dimensions and minimalist design, the Nanto water heater adapts to any space and thus can be placed anywhere. The contrast between matte and shiny materials and the juxtaposition of black and white give it a unique identity. The back has also been carefully designed to simplify installation. The easily accessible user interface completes the well-thought-out design."

Amaury Malhere, designer of GROUPE ATLANTIC

"Nanto is a water heater that wins people over with its fresh and friendly design vocabulary and is thus suitable for bathrooms and living spaces."

Nanto Max

Premium design compact water heater with advanced energy savings functions

ELECTRIC WATER HEATER

MODELS 15 TO 30
(Above sink)

reddot winner 2021

+ COMFORT

- Easy programming with quick mode selection
- Increase hot water production to meet unforeseen needs with Boost mode

+ INSTALLATION

- Easy installation with wall-mounting plates
- Visual guide on the product for simple installation:

Safe operation:

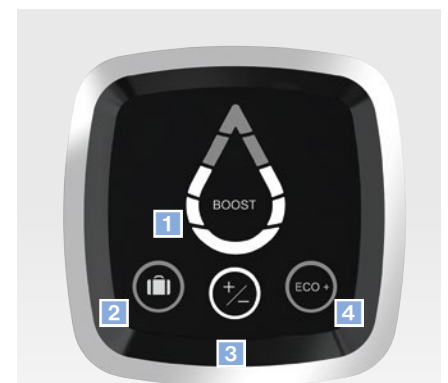

- IP 24 - full compliance with European standards for electrical safety and user protection

+ DURABILITY

- Long tank life thanks to O'Pro exclusive anti-corrosive protection
- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ ENERGY SAVINGS

- Eco+ self learning mode to provide the right amount of hot water when needed
- Absence mode to save energy when away from home
- Electronic thermostat for extremely precise temperature control
- High-efficiency water inlet
- CFC-free high-density polyurethane insulation

+ USER-FRIENDLINESS

- Ergonomic digital interface with heating indicator, operating modes and smart functions

- 1 Waterdrop LED Indicator:** level of hot water ready to use
- 2 Absence mode:** Anti-frost position (7 °C)
- 3 Manual mode:** Select required quantity of hot water
- 4 Eco+ mode:** Automatic operation according to consumer's daily habits

- 1** DIAMOND-QUALITY GLASS LINING for long life and reliability
- 2** Optimised stainless steel outlet pipe
- 3** High-density, 0% CFC polyurethane foam
- 4** MAGNESIUM ANODE for protection against corrosion
- 5** Copper heating element
- 6** Optimised inlet diffuser
- 7** ELECTRONIC REGULATION for temperature control accuracy

EXCLUSIVE ANTI-CORROSIVE SYSTEM

O'Pro technology uses an ohmic resistor to balance out the electric potential of both the tank and the heating element. This extends the life of the magnesium anode as well as increasing protection against corrosion.

Technical data

Model	Output (W)	Voltage (V)	Heat-up time ($\Delta t=50^{\circ}\text{C}$) (min)	Heat-up time ($\Delta t=35^{\circ}\text{C}$) (min)	Energy consumption (kWh/24 h at 65°C)	ErP energy class	Profile

Neo Lite

Modern and space-saving horizontal water heater

ELECTRIC WATER HEATER

MODELS 20 TO 30
(Horizontal wall-mounted)

+ COMFORT

- Fast heating with 2500 W copper heating element
- Dedicated solution for direct hot water availability

+ DURABILITY

- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange
- Wide flange opening for easy maintenance

+ INSTALLATION

- Easy installation with wall-mounting plates

Safe operation:

- IP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- Energy savings due to CFC-free high-density insulation foam
- High-efficiency water inlet

+ USER-FRIENDLINESS

- Heating and shower ready light indicator
- Ergonomic front knob for easy temperature control

- 1** Copper heating element
- 2** **DIAMOND-QUALITY GLASS LINING**
for long life and reliability
- 3** High-density, 0% CFC polyurethane foam
- 4** **MAGNESIUM ANODE**
for protection against corrosion
- 5** Inlet diffuser
- 6** Optimised stainless steel outlet pipe

Neo Plus

Space-saving horizontal water heater with digital display and anti-corrosive protection system

ELECTRIC WATER HEATER

MODELS 20 TO 30
(Horizontal wall-mounted)

+ COMFORT

- Fast heating with 2500 W copper heating element
- Wide flange opening and drainage port for easy maintenance

+ DURABILITY

- Long tank life thanks to O'Pro exclusive anti-corrosive protection
- Large-sized magnesium anode for increased tank protection
- Diamond-quality glass lining
- Dielectric connection
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- Easy installation with wall-mounting plates

Safe operation:

- IP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- Energy efficiency due to CFC-free high-density insulation foam
- High-efficiency water inlet

+ USER-FRIENDLINESS

- Digital temperature display
- Ergonomic front knob
- Heating and shower ready light indicator

- 1** Copper sheathed immersion heating element
- 2** **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 3** High-density, 0% CFC polyurethane foam
- 4** **LARGE SIZE MAGNESIUM** anode for increased tank protection
- 5** Inlet diffuser
- 6** Optimised stainless steel outlet pipe
- 7** **DRAINAGE PORT FOR EASY MAINTENANCE**

EXCLUSIVE ANTI-CORROSIVE SYSTEM

O'Pro technology uses an ohmic resistor to balance out the electric potential of both the tank and the heating element. This extends the life of the magnesium anode as well as increasing protection against corrosion.

Neo Max

Premium horizontal water heater providing full comfort and durable long-term operation

ELECTRIC WATER HEATER

MODELS 20 TO 30
(Horizontal wall-mounted)

+ COMFORT

- Dedicated solution for direct hot water availability
- Easy and precise temperature control

+ DURABILITY

- Steatite Technology: Ceramic dry heating element protected by a sleeve for limited scaling and easy maintenance
- Large-sized magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- Easy installation with wall-mounting plates

Safe operation:

- IP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- Eco position for greater energy savings
- Energy efficiency due to CFC-free high-density insulation foam
- High-efficiency water inlet

+ USER-FRIENDLINESS

- Digital temperature display
- Ergonomic front knob
- Heating and shower ready light indicator

- 1 Enamel-coated sleeve
- 2 High-density, 0% CFC polyurethane foam
- 3 **MAGNESIUM ANODE** for protection against corrosion
- 4 Inlet diffuser
- 5 Optimised stainless steel outlet pipe
- 6 **DIAMOND-QUALITY GLASS LINING** for long life and reliability

Steatite
TECHNOLOGY

DRY STEATITE HEATING ELEMENT

Adapted to aggressive, highly mineralised and desalinated water. Its protective enamel-coated steel sleeve makes maintenance easy, and there is no need ever to drain the tank to replace it.

Technical data

Model	Installation type	Output (W)	Voltage (V)	Heat-up time ($\Delta t=50^{\circ}\text{C}$) (min)	Heat-up time ($\Delta t=35^{\circ}\text{C}$) (min)	Energy consumption kWh/24 h at 65°C	ErP energy class

Vertigo

Space-saving water heater with flat design and multi-position installation

ELECTRIC WATER HEATER

MODELS 30 TO 100
(Multi-position installation)

+ COMFORT

- With its double-tank structure, water heats faster, and your hot shower is ready in less than 50 minutes
- Quick mode selection and temperature regulation thanks to front control knob

+ DURABILITY

- Double copper heating element
- Long tank life thanks to O'Pro exclusive anti-corrosive system
- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- Easy installation with wall-mounting plates and drilling template
- Multi-position installation – can be installed in vertical or horizontal position
- Space-saving with only 29cm depth

Safe operation:

- IP 24 – full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- Accurate electronic thermostat and finest temperature control
- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Intuitive interface with shower ready light indicator
- 1** Shower ready indicator: light is on when at least one shower is available
- 2** Quick mode selection control knob
- 3** Anti-frost mode (7°C)

- 1 **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 2 Optimised stainless steel outlet pipe
- 3 Sheathed immersion heating element (x2)
- 4 Inlet diffuser
- 5 High-density, 0% CFC polyurethane foam
- 6 **MAGNESIUM ANODE (X2)** for protection against corrosion
- 7 **ELECTRONIC THERMOSTAT** for temperature control accuracy

EXCLUSIVE ANTI-CORROSIVE SYSTEM

STEATITE CUBE 150

* Depending on models

Smart programming, energy savings and greater comfort, all in one connected water heater

New digital interface

Smart and stylish, Vertigo Steatite Wi-Fi and Steatite Cube Wi-Fi are space-saving water heaters that you can control from wherever you are, which offer huge advantages. They fit into any room in your home and meet all of your hot water needs.

Bringing you optimum thermal comfort on a daily basis while also regulating your energy consumption!

Cozytouch

Atlantic Cozytouch

CONNECT AND CONTROL YOUR WATER HEATER

Atlantic's smart water heaters can be controlled remotely with the Cozytouch application, customising the temperature and quantity of your hot water and saving energy.

The Atlantic Cozytouch application is user-friendly and simple. It allows you to:

Energy savings

Schedule absences and avoid unnecessary heating.

The Absence mode ensures energy savings while you are away and a hot water supply when you return.

Remotely control hot water production.

Check and regulate the quantity of hot water you want.

Adjust hot water production according to your current household needs.

The water heater learns from your everyday lifestyle, adjusts heating times according to your needs and saves energy.

Comfort

Regulate the water heater's consumption.

Monitor how much hot water and electricity the water heater uses.

Manage the unexpected and never run out of hot water.

The Boost function makes the water heater operate at maximum capacity to account for unexpected demands.

EASY SETUP

1 DOWNLOAD the free Cozytouch application.

Cozytouch

Download the App for free:

GET IT ON Google Play

Download on the App Store

2 CREATE AN ACCOUNT and add your Atlantic products.

3 CONNECT AND CONTROL your products remotely.

Steatite Cube Wi-Fi

Enhanced square design water heater with Wi-Fi connectivity

WI-FI CONNECTIVITY

Atlantic Ego

Classic water heater benefiting from all of Atlantic's expertise

ELECTRIC WATER HEATER

MODELS 30 TO 120
(Vertical wall-mounted)

MODELS 50 TO 100
(Horizontal wall-mounted)

+ COMFORT

- Flat, chrome-plated thermometer
- Fast heating

+ DURABILITY

- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

Safe operation:

- IP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Heating light indicator

- 1** DIAMOND-QUALITY GLASS LINING for long life and reliability
- 2** Optimised stainless steel
- 3** MAGNESIUM ANODE for protection against corrosion
- 4** Sheathed immersion heating element
- 5** Inlet diffuser
- 6** High-density, 0% CFC polyurethane foam

O'Pro +

Wide range with O'Pro protection technology for +50% tank life

ELECTRIC WATER HEATER

MODELS 30 TO 120
(Vertical wall-mounted)

MODELS 50 TO 100
(Horizontal wall-mounted)

+ COMFORT

- Flat, chrome-plated thermometer

+ DURABILITY

- Long tank life thanks to O'Pro exclusive anti-corrosive system
- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

Safe operation:

- IP 24 – full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Control knob on the bottom of the tank
- Heating light indicator

- 1 DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 2** Optimised stainless steel
- 3 MAGNESIUM ANODE** for protection against corrosion
- 4** Sheathed immersion heating element
- 5** Inlet diffuser
- 6** Mechanical thermostat
- 7** High-density, 0% CFC polyurethane foamC
- 8** Dielectric union

O'Pro TECHNOLOGY

EXCLUSIVE ANTI-CORROSIVE SYSTEM

O'Pro technology uses an ohmic resistor to balance out the electric potential of both the tank and the heating element. This extends the life of the magnesium anode as well as increasing protection against corrosion.

Technical data

Model	Output (W)	Voltage (V)	Energy consumption kWh/24 h at 65°C	Heat-up time at 60°C (Δt=50°C)	ErP energy class	Profile

Genius

Combines timeless elegance with long-lasting reliability through O'Pro anti-corrosive system

ELECTRIC WATER HEATER

MODELS 50 TO 100
(Vertical wall-mounted)

+ COMFORT

- Boost function generates maximum heating for extra water needs
- Easy programming with quick mode selection

+ DURABILITY

- Long tank life thanks to O'Pro exclusive anti-corrosive protection
- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- Wall-mounted plates and drilling template available on the packaging
- Easy grip thanks to a brand new top and bottom cover design

Safe operation:

- IP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- Eco+ self learning mode to provide the right amount of hot water when needed
- Absence mode: Allows you to save energy when away from home
- Electronic thermostat for extremely precise temperature control
- High-efficiency water inlet
- CFC-free high-density polyurethane insulation

+ USER-FRIENDLINESS

- Ergonomic digital interface with heating indicator, operating modes and smart functions

- 1 Waterdrop LED indicator:** level of hot water ready to use
- 2 Absence mode:** Anti-frost position (7 °C)
- 3 Manual mode:** Select required quantity of hot water
- 4 Eco+ mode:** Automatic operation according to consumer's daily habits

- 1 **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 2 Optimised stainless steel outlet pipe
- 3 High-density, 0% CFC polyurethane foam
- 4 **MAGNESIUM ANODE** for protection against corrosion
- 5 Copper heating element
- 6 Optimised inlet diffuser
- 7 **ELECTRONIC REGULATION** for temperature control accuracy

Steatite

Steatite technology water heater with highly accurate controls provides full comfort and durable long-term operation with all types of water

ELECTRIC WATER HEATER

MODELS 50 TO 200
(Vertical wall-mounted)

+ COMFORT

- Flat, chrome-plated thermometer*
- Easy-to-change heating temperature thanks to simple mechanical controls

+ DURABILITY

- Steatite technology: Ceramic dry heating element protected by a sleeve for limited scaling and easy maintenance
- Magnesium anode for increased tank protection
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

Safe operation:

- IIP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Front control knob
- Heating light indicator

* Only for model 50 to 100

- 1 **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 2 Optimised stainless steel outlet pipe
- 3 **MAGNESIUM ANODE** for protection against corrosion
- 4 Inlet diffuser
- 5 Enamel-coated sleeve
- 6 High-density, 0% CFC polyurethane foam
- 7 Dielectric union

Steatite
TECHNOLOGY

DRY STEATITE HEATING ELEMENT

Adapted to aggressive, highly mineralised and desalinated water. Its protective enamel-coated steel sleeve makes maintenance easy, and there is no need ever to drain the tank to replace it.

Technical data

Model	Output (W)	Voltage (V)	Energy consumption kWh/24 h at 65°C	Heat-up time at 60°C (Δt=50°C)	ErP energy class	Profile

EXCLUSIVE ANTI-CORROSIVE SYSTEM

O'Pro technology uses an ohmic resistor to balance out the electric potential of both the tank and the heating element. This extends the life of the magnesium anode as well as increasing protection against corrosion.

Steatite Central Domestic

Central domestic water heater with Steatite technology

ELECTRIC WATER HEATER

MODELS 200 TO 300
(Floor-standing)

+ COMFORT

- Greater comfort thanks to one large-capacity central storage tank

+ DURABILITY

- Steatite technology: Ceramic dry heating element protected by a sleeve for limited scaling and easy maintenance
- Diamond-quality glass lining
- Magnesium anode for increased tank protection
- Pressure relief valve
- Dielectric union
- Specific lip gasket to prevent corrosion around the flange

+ INSTALLATION

Safe operation:

- IP 24 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

- 1 Hot water outlet
- 2 **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 3 High-density, 0% CFC polyurethane foam
- 4 **MAGNESIUM ANODE** for protection against corrosion
- 5 Enamel-coated sleeve
- 6 Cold water inlet diffuser

Steatite
TECHNOLOGY

DRY STEATITE HEATING ELEMENT

Adapted to aggressive, highly mineralised and desalinated water. Its protective enamel-coated steel sleeve makes maintenance easy, and there is no need ever to drain the tank to replace it.

Wide range of highly efficient water heaters, equipped with ACI hybrid dynamic anti-corrosive protection

ELECTRIC WATER HEATER

STANDARD MODELS : 50 TO 200
(Vertical wall-mounted)

COMPACT MODELS : 100 TO 200
(Vertical wall-mounted)

MODELS : 150 TO 300 (Floor-standing)

MODELS : 100 TO 200 (Horizontal wall-mounted)

+ COMFORT

- Precise, constant and reliable heating temperature thanks to the electronic regulation

+ DURABILITY

- ACI hybrid technology: Dynamic anti-corrosive protection
- Steatite technology: Ceramic dry heating element protected by a sleeve for limited scaling and easy maintenance
- New electronic card: continuous protection of the 10mA tank
- Diamond-quality glass lining
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- Vertical wall-mounted, horizontal wall-mounted & floor-standing versions to match all interior installation requirements
- Fully detachable next-generation screw-fixed hood
- Top and bottom handles for better grip

Safe operation:

- IP 25 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- Accurate temperature control thanks to electronic thermostat
- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Heating light indicator
- Light-up display on the hood for easy reading

- 1 High-density, 0% CFC polyurethane
- 2 **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 3 **ACI HYBRID ANTI-CORROSIVE SYSTEM**
- 4 Optimised stainless steel
- 5 Enamel-coated sleeve
- 6 **STEATITE DRY HEATING ELEMENT**
- 7 Stainless steel water inlet
- 8 Electronic thermostat

ACi
hybrid

Patented ACI hybrid technology guarantees you:

- + Permanent protection of the tank in all types of water
- + Limited scaling and easy maintenance
- + Immediate, permanent protection thanks to the combination of a continuous current generated by the titanium anode and the magnesium

Zeneo

Wide range of highly efficient water heaters, equipped with ACI hybrid dynamic anti-corrosive protection

Rotating dielectric union included

Indirect and combi water heaters

1

COIL HEAT EXCHANGER

- + Optimised heat exchanger located at the bottom to heat the tank
- + High-efficiency cold water inlet, preventing hot and cold water from mixing to maintain a constant water temperature

The built-in coil is heated by a primary circuit connected to an external energy source that heats water in the tank. If back-up is needed, an optional electric kit can be installed.

2

TANK-IN-TANK

Safe operation:

- + Exclusive annular heat exchanger to heat the tank
- + High-efficiency cold water inlet, preventing hot and cold water from mixing to maintain a constant water temperature

The annular heat exchanger inside the tank offers a large surface for heat exchanges between the contained in the tank and the primary circuit. It also allows the water heater to be placed in a vertical or horizontal position, depending on installation configurations. The exclusive annular heat exchanger provides minimal pressure loss and can be operated even where no pump is fitted within the primary circuit.

Water heater equipped with built-in coil and O'Pro protection

COMBI WATER HEATER

MODEL 80 TO 100
(Vertical wall-mounted)

+ COMFORT

- Flat, chrome-plated thermometer
- Easy-to-change heating temperature thanks to simple mechanical controls

+ DURABILITY

- Equipped with a high-performance coil
- Long tank lifetime thanks to O'Pro exclusive anti-corrosive system, which permanently combats rust
- Magnesium anode for increased tank protection
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- Suitable for domestic boilers and compatible with solar installations

Safe operation:

- IP 23 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings

+ USER-FRIENDLINESS

- Heating light indicator

- 1 DIAMOND-QUALITY ENAMEL**
(glass-lined inner tank)
- 2** Optimised stainless outlet pipe
- 3 MAGNESIUM ANODE**
- 4** Sheathed immersion heating element
- 5** Inlet diffuser
- 6** High-density, 0% CFC polyurethane foam
- 7** Dielectric union

EXCLUSIVE ANTI-CORROSIVE SYSTEM

O'Pro technology uses an ohmic resistor to balance out the electric potential of both the tank and the heating element. This extends the life of the magnesium anode as well as increasing protection against corrosion.

Mileo/Mileo +

Water heater fitted with coil developed for operation with heat pumps

INDIRECT & COMBI WATER HEATER

MODEL 200 TO 300
(Floor-standing)

+ COMFORT

- Daily hot water for guaranteed comfort
- Built-in thermometer on the front lets you easily see the temperature of the water in the tank
- Two ranges optimised for heat pumps, meeting all requirements (aerothermal and geothermal):
 - Mileo compatible with aerothermal heat pumps only
 - Mileo + compatible with aerothermal and geothermal heat pumps

+ DURABILITY

- Magnesium anode for better tank protection
- Pressure relief valve
- Dielectric union
- Specific lip gasket to avoid corrosion around the flange

+ INSTALLATION

- IP 25 - full compliance with European standards for electrical safety and user protection

+ ENERGY SAVINGS

- High-efficiency water inlet
- CFC-free high-density insulation for greater energy savings
- Insulation jacket for greater energy savings

Calypso VM

Highly efficient wall-mounted heat pump water heater

HEAT PUMP WATER HEATER

MODEL 100 TO 150
(Vertical wall-mounted)

CONNECTIVITY

Manage and tailor your water heater to your needs remotely with the **Cozytouch** application

Cozytouch Bridge required

+ COMFORT

- Connectivity & remote control Piloting thanks to the Cozytouch application
- Auto function for smart operation
- Comfort thanks to electric back-up

+ DURABILITY

- ACI hybrid anti-corrosive system
- Steatite technology: Ceramic dry heating element protected by a sleeve for limited scaling and easy maintenance
- Diamond-quality glass lining for long life and reliability
- Pressure relief valve
- Dielectric union
- Specific lip gasket to prevent corrosion around the flange

+ INSTALLATION

- Easy installation with optimised wall brackets

+ ENERGY SAVINGS

- Smart energy consumption control
- Energy savings thanks to a high-performance heat pump
- CFC-free high-density insulation around tank for greater energy savings
- Photovoltaic connection to benefit from free solar energy
- High-efficiency water inlet

+ USER-FRIENDLINESS

- Intuitive digital control panel with built-in daily programming and a range of modes that can be selected

- 1 User-friendly digital screen
- 2 Direct access to menu
- 3 Direct access to Boost mode
- 4 Navigation buttons
- 5 Validation button
- 6 Back button

- 1 Evaporator
- 2 High-efficiency heat pump with wide temperature range
- 3 **DIAMOND-QUALITY GLASS LINING** for long life and reliability
- 4 Enamel-coated sleeve and Steatite Heating Element
- 5 Air inlet/outlet
- 6 **ACI HYBRID ANTI-CORROSIVE PROTECTION**

Patented ACI hybrid technology guarantees you:

- + Permanent protection of the tank in all types of water
- + Limited scaling and easy maintenance
- + Immediate, permanent protection thanks to the combination of a continuous current generated by the titanium anode and the magnesium

(1) Compliant with EN 16147 conditions

Ideal for small surfaces

Suitable for all installations (adapted to small surfaces, low ceilings, corners)

Calypso Split Inverter

Wall-mounted or floor-standing heat pump water heater with outdoor compressor unit

HEAT PUMP WATER HEATER

MODEL 200 (Vertical wall-mounted)

MODEL 270 (Floor-standing)

CONNECTIVITY

Connect and control your heat pump water heater remotely using the **Cozytouch** application

Cozytouch Bridge required

+ COMFORT

- Connectivity & remote control thanks to the Cozytouch application
- High efficiency due to Inverter technology
- Low noise level for installation in living areas
- Auto function for smart control
- Comfort thanks to electric back-up

+ DURABILITY

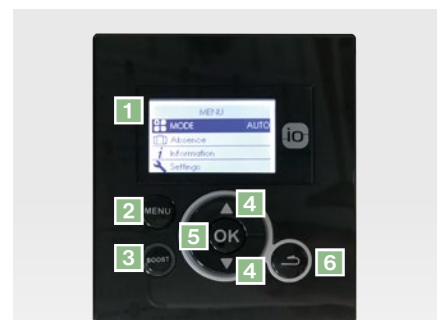

- ACI hybrid anti-corrosive protection
- Steatite Technology: Ceramic heating element protected by a sleeve to limit scaling
- Diamond-quality glass lining for long life and reliability
- Pressure relief valve
- Dielectric union
- Specific lip gasket to prevent corrosion around the flange

+ INSTALLATION

- Space-saving solution for installation even in small rooms thanks to outdoor unit
- Easy mounting for wall fixation
- Installation is recommended in geographical areas with temperatures ranging from -15 to 37°C

+ ENERGY SAVINGS

- Smart energy consumption control
- Energy savings thanks to a high-performance heat pump
- CFC-free high-density insulation around tank for increased energy savings
- High-efficiency water inlet

+ USER-FRIENDLINESS

- Intuitive digital control panel with built-in daily programming and a range of modes that can be selected

- 1 User-friendly digital screen
- 2 Direct access to menu
- 3 Direct access to Boost mode
- 4 Navigation buttons
- 5 Validation button
- 6 Back button

Patented ACI hybrid technology guarantees you:

- + Permanent protection of the tank in all types of water
- + Limited scaling and easy maintenance
- + Immediate, permanent protection thanks to the combination of a continuous current generated by the titanium anode and the magnesium

FLOOR-STANDING 270

OUTDOOR UNIT

Explorer

High-performance heat pump water heater with or without coil

HEAT PUMP WATER HEATER

MODEL 200 TO 270
(Floor-standing)

CONNECTIVITY

Connect and control your heat pump water heater remotely using the **Cozytouch application**

Cozytouch Bridge required

+ COMFORT

- Capable of producing hot water using several different types of energy: heat pump, electric back-up, boiler and solar (thermal and photovoltaic)
- Wide heat pump temperature range (-5 to 43°C)
- Household-friendly noise level (53 dB(a))
- Comfort thanks to electric back-up
- Re-circulation connection to provide comfort on all points-of-use (versions with coil only)
- Can be tilted down on one side for easy transport
- Remote control via your smartphone using the Cozytouch application

+ DURABILITY

- ACI hybrid anti-corrosive protection
- Steatite technology: Ceramic dry heating element protected by a sleeve for limited scaling and easy maintenance
- Diamond-quality glass lining for long life and reliability
- Pressure relief valve
- Dielectric union
- Specific lip gasket to prevent rust around the flange

+ INSTALLATION

- Easy to install with adjustable & ducted air inlet/outlet and adjustable feet

+ ENERGY SAVINGS

- High efficiency thanks to a COP > 3*
- Photovoltaic mode automatically chooses solar energy produce a store of hot water, maximising own energy consumption (set lower Twater overnight)
- Large coil optimised for fast heating, adapted for low-temperature devices (versions with coil only)
- More environmentally friendly R513A refrigerant (compared with R134A refrigerant)
- CFC-free high-density insulation for greater energy savings
- High-efficiency water inlet

+ USER-FRIENDLINESS

- Digital control panel with built-in day-to-day programming and a range of modes that can be selected
- 1** Menu button with access to general information, energy consumption and mode selection (Boost, Auto, Manual, Absence)
 - 2** Control knob for temperature adjustments
 - 3** Temperature selection button
 - 4** Return to previous screen view
 - 5** Graphical display of active mode and energy consumption statistics

- 1 Evaporator
- 2 High-efficiency heat pump with wide temperature range
- 3 Intuitive control panel
- 4 DIAMOND-QUALITY ENAMEL
- 5 ENAMEL-COATED SLEEVE AND STEATITE HEATING ELEMENT
- 6 Coil (1.2 m²): Solar mode & Boiler mode
- 7 Adjustable air inlet/outlet (360°)
- 8 ACI HYBRID ANTI-CORROSIVE PROTECTION
- 9 Adjustable feet

Patented ACI hybrid technology guarantees you:

- + Permanent protection of the tank in all types of water
- + Limited scaling and easy maintenance
- + Immediate, permanent protection thanks to the combination of a continuous current generated by the titanium anode and the magnesium

Heat pumps water heater smart functions & features

AUTO MODE

With Auto mode, heat pump water heaters fit perfectly into your life, learning your habits from one week to another and memorising them to provide you with everyday comfort by anticipating your needs, along with optimised energy savings.

CONNECTIVITY

Heat pump water heaters are compatible with Cozytouch technology (learn more on p.6) for remote control using a smartphone or tablet. With Cozytouch, you can monitor your appliance in real time (setting temperatures, monitoring electricity use, etc.) and tailor your everyday comfort, security and energy consumption to your standards. Cozytouch gives you complete control over your daily comfort and your energy-saving requirements.

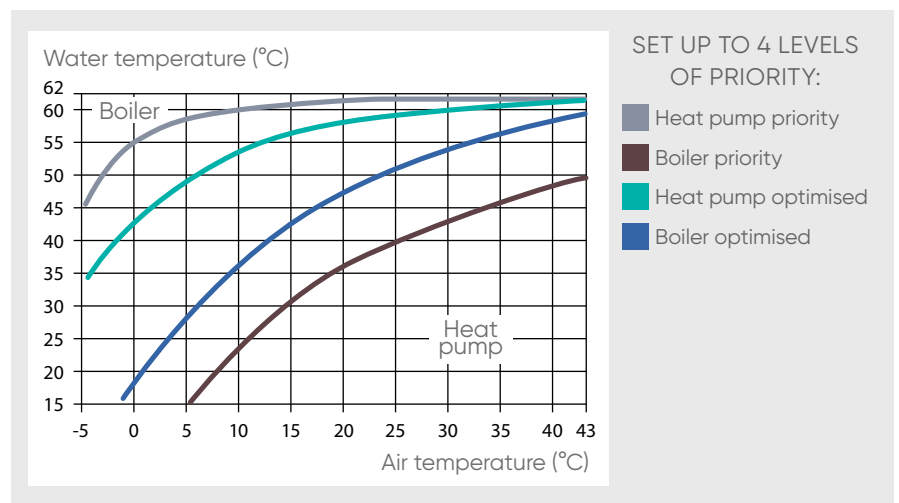

Cozytouch

SMART ENERGY*

When connected to a boiler system, Explorer activates its Smart Energy function, which helps choose the right energy source at the right moment, factoring in the air and water temperature, by calculating its energy consumption.

Therefore, Smart Energy grants the most efficient and economical Explorer performance when connected to a boiler system.

EXAMPLES OF A HEATING CYCLE AT 2 DIFFERENT AIR TEMPERATURE conditions with pre-selected HEAT PUMP OPTIMISED mode

AMBIENT AIR AT 5°C

AMBIENT AIR AT 25°C

*Model with coil only. **Heating with electric back-up if boiler is off

PHOTOVOLTAIC COMPATIBILITY

Thanks to photovoltaic compatibility, heat pump water heaters are open to Smart Grid technology.

Combined with a photovoltaic installation, heat pump water heaters give you free energy storage, since photovoltaic panels collect free solar energy and send it to the heat pump water heater for storage and use.

Therefore, solar and heat pump energy allow you to heat water at no cost, as well as supplying free energy to domestic appliances, no matter the weather.

- More energy savings on all of your installed appliances
- Free energy storage
- Low-consumption water heater that offers continuous energy savings, no matter the weather
- Use of solar and heat pump energy to heat water at no cost, and to supply free energy to domestic appliances
- A specific connection to automatically switch to photovoltaic energy when available

PHOTOVOLTAIC MODE

When activated, this mode allows Explorer to use free solar energy to produce hot water. Photovoltaic mode maximises consumption of your own energy thanks to 3 features:

- During the night, set temperature is reduced to 45°C, allowing Explorer to use less energy to heat water.
- During the day, when a photovoltaic signal is detected, Explorer uses the solar energy to produce a store of hot water at the maximum set temperature (62°C).
- If no photovoltaic signal is detected, Explorer gets back to its previous mode to heat water.

Typical operation of solar installation

Solar energy is collected by the photovoltaic panels and sent to the inverter to adapt to all of the installed household appliances **1**

Electricity is then sent to the working domestic appliances or to the power grid **2**
Explorer is working on the power grid supply (normal electricity supply) **3**

Installation accessories

➤ Atlantic offers a wide range of accessories that make installation easy, and improve the way water heaters fit in their surroundings

VERTICAL WALL-MOUNTED VERSIONS

+ OPTIFIX

Easy and quick mounting and replacement

- Adapted to replace main brands of water heaters already installed
- Fitted for easy installation even in hard-to-reach locations
- No need to drill new holes
- Safe and robust installation of the new water heater includes all components required for installation (wall plate and bolts)

Compatible with

- Ego, O'Pro+, O'Pro Turbo, Steatite & O'Pro Small, O'Pro models from 10 to 100

Characteristics

- 36 cm width
- Galvanized steel

+ QUICK-FITTING PLATE

- Ideal for confined spaces, the appliance is attached to this support
- Easy to fit the appliance in corner locations
- Saves fitting time, no need to have access for screwing to the wall

Compatible with

- Zeneo wall-mounted
- O'Pro Central Domestic wall-mounted

Characteristics

- Model 50 to 100 = 1 plate
- Model 150 to 200 = 2 plates

+ UNIVERSAL STAND

- Designed for easy access to water heater's fittings
- Designed to easily install the safety pressure valve, cold & hot inlets/outlets
- Ideal where there is no load-bearing wall
- Adjustable height
- Can be fitted with stabiliser feet

Compatible with

- Zeneo wall-mounted,
- O'Pro Central Domestic wall-mounted
- Calypso

Characteristics

- Width and length: 50 cm
- Height: 55 cm
- Bearing weight 3.4 kg

+ UNIVERSAL WALL FASTENER

- Simplified replacing of old water heaters
- No sealing or fixing to be redone = saves time when installing
- Old fixings from any water heater brand can be re-used, with no need to drill new holes

Compatible with

- Zeneo wall-mounted
- O'Pro Central Domestic wall-mounted

HORIZONTAL WALL-MOUNTED & FLOOR-STANDING WATER HEATERS

+ UNDER CEILING BELT

- Mandatory for ceiling installation
- Allows the appliance to slide a few centimetres when positioning it in place

Compatible with

- O'Pro Central Domestic wall-mounted

+ RISER

- Helps with pipes installation
- Optimum solution when you need clear space below the appliance

Compatible with

- Zeneo floor-standing
- O'Pro Central Domestic floor-standing

ACI HYBRID WATER HEATER KITS

+ TRI 400 V KIT FOR ACI

- Kit to transform single-phase water heaters into 3-phase water heaters.

Compatible with

- Zeneo

+ AGRO KIT (ACI HYBRID ONLY)

- Thermostat for agricultural or tertiary use (product warranty modified)

Compatible with

- Zeneo

EASYRACCORD

+ EASYRACCORD HYDRAULIC CONNECTION

- Easy hydraulic connection thanks to the mobility of both parties. Easier workpiece clamping thanks to the steel part in the form of a nut.

Compatible with

- Zeneo
- Calypso

ELECTRIC ROOM HEATING

Room heating the right choice

4 MAIN ADVANTAGES of Atlantic room heating

1

DURABILITY

By selecting quality materials and sleek assembly, we create devices that will stand the test of time.

2

COMFORT

Thermal comfort is essential to everyone's well-being. Atlantic's heating experts develop thermal comfort solutions that suit everyone's needs.

3

ENERGY SAVINGS

Energy savings achieved through optimised controls & smart functions that grant users comfort with a maximum level of energy savings.

4

DESIGN

A combination of attractive design, high-quality materials and smart engineering to create a stylish & aesthetically pleasing environment.

Selecting the right appliance

FLOOR AREA DIMENSIONS AND POWER

With a well insulated apartment or room, you will need approx. 1000 W per 10 m² to comply with the latest local requirements.

USER PROTECTION AND SAFETY

The ingress protection (IP) rating of a panel heater must also be considered when choosing its location. Atlantic panel heaters have a high IP index of up to IP 24 and can be installed in areas 2 or 3 of your bathroom, depending on the country's regulations. Atlantic products' IP index guarantees safe operation.

Heating modes and technologies for different needs

HEATING MODES AND TECHNOLOGIES FOR DIFFERENT NEEDS

ACTIVE HEAT - Electric convectors

Aluminium heating element with a diffuser for active heating. Cold air circulates through the appliance and is heated up. Free convection distributes the heat throughout the room.

EXTENSIVE HEAT - Electric panels

Black-painted extruded large surface aluminium heating element for extensive heating. The large aluminium plates provide an extensive level of comfort and perceived comfort. Such products are recommended for "day rooms" (i.e. living room) or areas with high ceilings.

GENTLE HEAT - Electric radiators

Combination of extruded aluminium plates, cast iron and heating films or fluid technology for gentle, comfortable heating. These models offer a low surface temperature, providing gentle, evenly spread and long-lasting heat.

HEATING ELEMENTS

Atlantic uses different types of heating elements to offer its clients the widest range of comfort ever.

Light, modern and fast-reacting aluminium is the ideal solution for anyone who wants a **quick rise in temperature**.

These appliances surround you with continuous gentle heat similar to central heating, due to their capacity **to store heat and release it gradually without drying the ambient air**.

These appliances provide a **lasting and gradual feeling of warmth** in the room due to the cast iron element and the heating cable on the front panel.

ENERGY-SAVING TECHNOLOGIES

Connectivity & remote control

With the Atlantic Cozytouch application, you can control your appliances remotely and easily track the electricity consumption of all connected products.

Cozytouch

Open/closed window detection

Open and closed window sensors mean the appliance shuts off automatically to avoid heating the room unnecessarily. The appliance automatically resumes its original programming when it senses closed windows.

Smart Pilot

One simple move, and the panel heater takes care of everything. With the Smart Pilot function, the appliance automatically adapts to the user's lifestyle, to easily achieve both optimum comfort and maximum energy savings.

Smart Pilot

- +** **Memorises the user's daily rhythm by**
 - Identifying & memorising when the user is in home
 - Conducting a fine-tuned analysis every week
- +** **Anticipates heating** according to the user's lifestyle, ensuring that the room is already at the right temperature upon arrival
- +** **Adapts to unforeseen events** with presence and opened window detection, to maintain the user's comfort

What are the ErP regulations for **electric heating products**?

Effective since **1 January 2018**, in an aim **to optimise energy savings on CE marked products, the ErP** ("Energy-related Products") regulations **apply to all electric heating products**: convectors, extensive heat panel heaters, radiators and bathroom radiators. ErP regulations are based on **a calculation of energy efficiency** (Ns).

The two main criteria for the energy efficiency (Ns) calculation are:

- **Regulation performance**: From basic mechanical thermostat to digital weekly programmer.
- **Advanced features presence**: Such as presence/absence detection, remote control or open window detection.

Electric room heating

Heat up any atmosphere by adapting to your pace of life, even when you sleep... Discover our range of heating solutions designed for all budgets, all areas and all of your needs.

F617/F127

Traditional French active heat convector with user-friendly controls

ACTIVE HEAT CONVECTOR

MODEL 500 TO 2000W

+ COMFORT

- Easy prog: 24/7, program your device according to your daily rhythm for greater comfort (F127)
- Sheathed heating element with an aluminium diffuser for active heating

+ DESIGN

- Front air outlet wings
- Available model:
 -  Horizontal
 - 
- Colour:
 -  White (RAL 9016)

+ INSTALLATION

- Class II and IP 24 protection with dual electric insulation for the greatest safety
- Easy to install: H-shaped vertical support, which can also be used as an installation template

+ ENERGY SAVINGS

- High-precision electronic thermostat
- **F127**: Energy Consumption Indicator on LCD Control Panel

+ USER-FRIENDLINESS

F617:

- Mode-setting cursor and control knob
- Modes: Comfort, Eco, Anti-Frost, Off

- 1** Mode-setting cursor
- 2** Temperature control knob
- 3** Heating light indicator

+ USER-FRIENDLINESS

F127:

- Ergonomic LCD digital controls
- Modes: Manual/Prog

- 1** Temperature and active mode display (Modes: Manual/Prog)
- 2** Navigation arrows
- 3** Access to menu/select
- 4** Energy consumption indicator

EASY PROG (F127)

- **Manual mode:** Allows you to set up the device at the desired temperature, from Off to 30°C.
- **Prog mode:** Allows you to set up to 3 periods of Comfort temperature by day (24 hrs) over 7 days. You can also copy and apply a daily programme to other days of the week.

In order to be ErP/CE-compliant, F617 must be installed with centralised weekly programming.

- 1** LCD digital controls
- 2** Air outlet
- 3** Overheating safety device
- 4** SHEATHED HEATING ELEMENT WITH ALUMINIUM DIFFUSER
- 5** ROOM TEMPERATURE SENSOR
- 6** Front panel

COMPACT BATHROOM HEATERS

p.132

TOWEL DRYER

p.136

BATHROOM RADIATORS

p.138

Heating modes and technologies for different needs

Atlantic bathroom solutions **OFFER:**

1

COMFORT AT ALL TIMES

- Fast heating of the bathroom before showering or bathing
- Warm towels before use
- Dry towels after use
- Additional heating boost for devices equipped with turbo fan

2

FULL COMPLIANCE WITH DAILY RHYTHM AND NEEDS

- Programmable devices for better management of their energy use
- Practical accessories to make life easier, such as repositionable towel holders and towel rails
- Quick room heating (about 15 minutes) when equipped with turbo fan

3

PERFECT INTEGRATION INTO YOUR HOME

- Wide choice of appliances with unique design, various shapes and valuable materials
- 8 colours available to perfectly match your tastes and interior design
- Large variety of sizes, suitable for even the most confined spaces
- Wide output range to fit all types of installation

4

EASY INSTALLATION AND MAINTENANCE

- Installation template on packaging back
- Easy to install for any mechanic handyman (with the appropriate tools)
- Once hanged, they are almost maintenance-free
- ASP technology ensures that the device is cleaned quickly

ATLANTIC TECHNOLOGIES

With Atlantic, you can benefit from a wide range of bathroom radiators:

ELECTRIC BATHROOM RADIATORS

Are perfectly silent and do not need any drainage maintenance (no risk of leaks). Electric bathroom radiators can either be dry or filled with heat-conducting fluid

WATER-FILLED BATHROOM RADIATORS

Are connected to central heating (boiler or heat pump)

MIXED BATHROOM RADIATORS

For comfort whatever the season, they connect to the boiler in the winter and use electricity for heat when the boiler is off in the summer

3CS TECHNOLOGY

PERFECT COMFORT AND SIGNIFICANT ENERGY SAVINGS

With a unique technology called the Triple Comfort System (3CS), Atlantic bathroom radiators ensure a temperature for ideal comfort, unlike traditional towel dryers. Even covered with towels, it will heat the whole bathroom perfectly. A powerful fan will provide the right room temperature in a few minutes.

+ Thanks to the Shower mode, the bathroom radiator takes care of everything:

Fast heating of the bathroom with the fan

Warming towels while showering

Drying towels after use

Doris Digital

Nefertiti

Adelis

Sensium

BOOST COMFORT WITHOUT WAITING

The Boost function rapidly heats the bathroom thanks to the built-in fan: 3°C in 15 minutes.

CONNECTIVITY AND REMOTE CONTROL WITH THE COZYTOUCH APPLICATION

The Atlantic Cozytouch application is easy to use and intuitive. You can control your comfort and track your energy consumption in real time wherever you are.

Cozytouch

Atlantic technologies

DESIGN

With a wide range of models, colours and shapes, Atlantic offers the perfect alliance between design and technology for your bathroom radiator.

Colours

For perfectly complementing your tastes and interior design, Atlantic has developed a wide variety of models with a nice range of modern colours** to choose from.

Shape

Models with narrow and slim design are available, allowing easier integration into narrow spaces.

Atlantic has also developed a rotating model (with collectors on the left or the right). Bathroom radiators with round or flat tube shapes are recommended for beautifully matching your bathroom decor and lines.

**On special order

Theola Digital

Minimalist design electric bathroom radiator with weekly programming for greater energy savings

BATHROOM RADIATOR

MODEL 300 TO 750W (Standard)

MODEL 300 TO 500W (Narrow)

+ COMFORT

- Towel dryer with large rails for drying towels and clothes quickly
- Constant and gentle heat due to the heat-conducting fluid
- Quick temperature rise with Boost mode (adjustable from 15min to 60min)

+ DESIGN

- Elegant design with standard and narrow models to fit any bathroom
- Colour:
 - White (RAL 9016)

+ ENERGY SAVINGS

- Digital thermostat
- 7 customisable programs to meet everyone's needs

+ USER-FRIENDLINESS

- New ergonomic control panel with LED screen designed for easy use

- 1 Boost mode and boost LED indicator
- 2 Manual mode
- 3 Programming mode
- 4 Setting
- 5 Selection mode button
- 6 Heating indicator
- 7 Navigation buttons

- 1 Towel rails
- 2 OVERHEATING SAFETY DEVICE
- 3 Heating element
- 4 ROOM TEMPERATURE SENSOR
- 5 LCD digital controls
- 6 HEAT-CONDUCTING FLUID
- 7 Vertical collectors

2012 Digital

Slim bathroom radiator with digital control box

BATHROOM RADIATOR

MODEL 500 TO 1000W (Standard)

MODEL 300 TO 500W (Narrow)

+ COMFORT

- Solution for towel warming, towel drying and bathroom heating
- Heat-conducting fluid for constant and gentle heating
- Free weekly programming
- Boost function for greater comfort

+ DESIGN

- Elegant slim design adapted for narrow spaces
- Available widths: 400, 500, 550 mm
- Colour:
 - White (RAL 9016)

+ ENERGY SAVINGS

- Energy savings through built-in programming
- Electronic thermostat
- 6-setting mode pilot wire: Comfort, Comfort -1°C, Comfort -2°C, Economy, Anti-frost, Stop

+ USER-FRIENDLINESS

- Ergonomic digital control box
- 1** LCD screen showing temperature and active mode
- 2** Navigation buttons
- 3** Back button
- 4** Access to menu/select
- 5** Boost function

- 1** Towel rails
- 2** OVERHEATING SAFETY DEVICE
- 3** Heating element

Doris Digital

Elegant bathroom radiator with fan and built-in programming

BATHROOM RADIATOR

MODEL 500 TO 1000W (Without fan)

MODEL 1500 TO 2000W (With fan)

+ COMFORT

- Bathroom radiator fitted with 3CS technology: solution for both towel drying, towel warming and bathroom heating
- Standard model is available in either electric or mixed (electric + water filled) versions
- Available models: with or without fan
- Model with fan : Boost function: rapid heating (+ 3 ° C in less than 15 minutes)
- Heat-conducting fluid

+ DESIGN

- Available models : Standard & Narrow
- Colours:

- Glossy White
- Carat White
- Anthracite grey
- Black

+ ENERGY SAVINGS

- Energy savings thanks to weekly programming
- Customisable programming

+ USER-FRIENDLINESS

- Digital touch screen at eye level

- 1 LCD screen showing temperature and active mode
- 2 Navigation buttons
- 3 Back button
- 4 Access to menu/select
- 5 Boost mode

- 1 Towel rail tubes
- 2 LCD DIGITAL CONTROLS
- 3 HEAT-CONDUCTING FLUID
- 4 Heating element
- 5 Turbo fan 1000 W (optional)
- 6 ROOM TEMPERATURE SENSOR
- 7 Vertical collectors

Nefertiti

Aesthetic and convenient bathroom radiator with a large choice of colours

BATHROOM RADIATOR

MODELS 1750 TO 2000W

+ COMFORT

- Bathroom radiator fitted with 3CS technology: ideal temperature for comfort and pleasantly warm towels
- Large heating area for drying towels and clothes quickly
- Available only in mixed version (electric+water filled)
- Extra 1000W turbo fan

+ DESIGN

- Two repositionable towel holders
- Colours:
 - Glossy White
 - Carat White
 - Anthracite grey
 - Black

+ ENERGY SAVINGS

- Energy savings through built-in programming
- Digital thermostat
- 6-setting mode pilot wire: Comfort, Comfort -1°C, Comfort -2°C, Economy, Anti-frost, Stop

+ USER-FRIENDLINESS

- Remote controls with shower cycle (models with fan)
- 1** LCD screen with temperature and settings display
- 2** Shower mode
- 3** User-friendly navigation

- 1** Towel rail blades
- 2** Vertical collectors
- 3** Heat-conducting fluid
- 4** **ELECTRONIC THERMOSTAT**
- 5** Heating element
- 6** Room temperature sensor
- 7** **TURBO FAN 1000 W (OPTIONAL)**

CONNECTIVITY

Connect and control your bathroom heating remotely with the **Cozytouch application**

Cozytouch Bridge required

+ COMFORT

- Available in electric and water-filled versions
- Manage and customise your bathroom heating remotely according to your needs using the Cozytouch application
- 3CS technology: ideal temperature for comfort and pleasantly warm towels
- Boost function: fast heating (+ 3 °C in less than 15 minutes)

+ DESIGN

- Available models : Standard and Narrow

• Colours:

- Glossy White
- Black
- Carat White
- Beige
- Satin Graphite
- Satin Sea Green
- Charcoal Grey
- Deep Blue

+ ENERGY SAVINGS

- Energy savings through customisable programming
- Digital thermostat
- Monitor electricity use thanks to the Cozytouch application

+ USER-FRIENDLINESS

- New Digital Display
- 1** Color LCD screen
- 2** Selection and validation button
- 3** Boost mode with direct access button
- 4** Dry mode with direct access button
- 5** up and down arrows
- 6** Return button

Sensium

Premium design bathroom radiator equipped with a high-end sound system

BATHROOM RADIATOR

MODEL 1750W

CONNECTIVITY

Connect and control your bathroom heating remotely with the **Cozytouch application**

Cozytouch Bridge required

+ COMFORT

- Large heating surface for drying towels and clothes
- Homogeneous and gentle heat
- Manage and customise your bathroom heating remotely according to your needs using the Cozytouch application
- Option to listen to music through a smartphone via Bluetooth (HD-sound with audio-system CABASSE)
- Fitted with 3CS technology: Heating the room, warming the towels before use and drying them after use
- Boost function: fast heating (+ 3 °C in less than 15 minutes)
- Equipped with a new silent fan

+ DESIGN

- Outstanding design and subdued light behind the radiator
- Sophisticated technology and HD sound
- Left or right collector models
- Colours:
 - Black (RAL 9005)
 - White (RAL 9010)

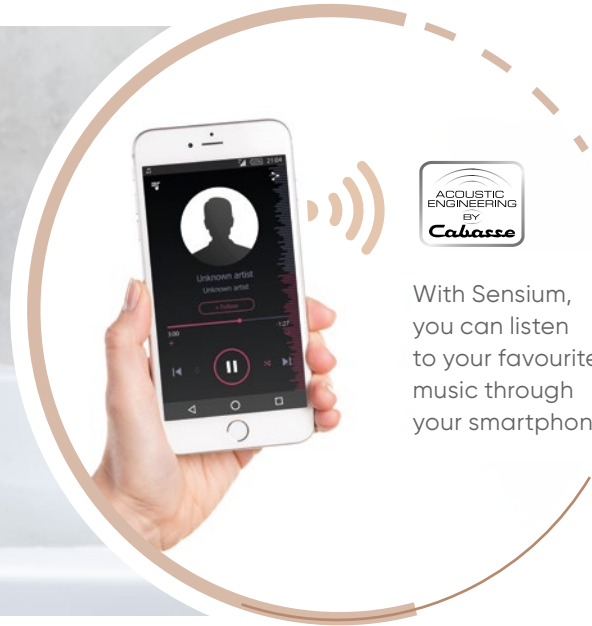

+ ENERGY SAVINGS

- Monitor electricity use thanks to the Cozytouch application
- Smart control function with memory, learning the user's lifestyle & comfort requirements
- Absence and presence detection

+ USER-FRIENDLINESS

- Intuitive control panel
- 1 Mode control knob
- 2 Boost function
- 3 Drying mode
- 4 LCD screen

With Sensium,
you can listen
to your favourite
music through
your smartphone

VENTILATION

designed to bring fresh air into
your home

HEAT RECOVERY SYSTEM

p.154

HEAT PUMP WATER HEATER WORKING OFF OF EXHAUST AIR HEATERS

p.158

Why ventilate?

> New, low-energy building standards on passive houses require ventilation that evacuates excess humidity and brings in fresh air.

SYSTEM PRINCIPLES

- Renew the air
- Eliminate humidity and odours
- Ensure hygiene and comfort for users
- Preserve buildings by preventing moisture development
- Feel fresh and relaxed at home
- Save the heating energy contained in extracted air

+ SELF-ADJUSTING SINGLE FLOW:

Air quality suitable for renovation

- + The used air is extracted from sanitary rooms (kitchen, bathroom, toilet and cellar) through vents connected to the ventilation system with flexible ducts.
- + The new air enters via existing air inlets.

+ HYGRO-ADJUSTING SINGLE FLOW:

Energy savings and rate modulation

- + The stale air is extracted from sanitary rooms (kitchen, bathroom, toilet and laundry) through hydro-adjustable vents which open according to ambient humidity or via timed vents. The vents are connected to the unit by insulated ducts. The used air is then discharged outside.
- + The new air enters the home via self-adjusting air inlets (for Hygro A CMV) or hydro-adjusting inlets (for Hygro B CMV), placed above the windows in the bedrooms and living room.

DUAL FLOW: AIR QUALITY, COMFORT AND ENERGY SAVINGS

A system which **extracts stale air** from sanitary rooms (kitchen, bathroom, toilet and laundry) and which, at the same time, injects **new air** from outside. This air is pre-heated in an exchanger that recovers heat from the calories from the extracted air. The fresh air is **filtered**. With a high-capacity dual-flow system from the Optimocosity range, in winter the new air may enter the dual flow at -5°C . It passes through the exchanger and recovers 92% of the heat from the extracted air.

+ SUMMER

In summer, during the early morning and late evening, cool dry air is drawn in, filtered and circulated into living areas. The incoming air bypasses the heat exchanger. Humid air and odours are continually extracted from toilets, bathrooms and kitchens.

+ WINTER

In winter, fresh air is drawn from the outside. The heat exchanger transfers heat from the air being expelled to the air coming in, achieving energy savings. Fresh air is also filtered.

Primocosity HR BP

Ventilation system for optimum comfort and a healthy home

DUAL FLOW VENTILATION

+ COMFORT

- Primocosity HR: High-efficiency plastic exchanger, with low consumption EC 2 speed motors
- Primocosity HR/HR SRI: 90% recovery of air energy
- High-performance heat exchanger
- Reduced heating and cooling costs
- Power consumption:
 - Primocosity HR & HRSI: 48 W-Th-C
- Power supply: Mono 230 V – 50 Hz
- PPE insulated casing with insulation foam-covered top

+ EASY MAINTENANCE

- Horizontal installation easily located under the roof, and used to replace existing products
- Exchanger with automatic defrost mode
- Radio control for kitchen boost air extraction (SRI model)
- Manual bypass

+ ACOUSTIC AND THERMAL COMFORT

- No cold air enters the home as it is preheated, and warm air is evenly distributed
- Summer comfort function: Nocturnal air cooling thanks to the manual bypass
- Ideal solution to allergy problems
- Exhausts stale air containing odours and pollutants
- Removes moisture
- Remote control of all functions
- Quiet air flow
- Suits all types of dwellings with 1-4 bathrooms/toilets plus up to 7 other rooms
- Air flow regulated room by room thanks to integrated regulators on the air outlets

+ SRI RADIO REMOTE CONTROL PRIMOCOSY HR SRI

OPERATING PRINCIPLE

A fan takes clean air from the outside and transfers it to the bedrooms and living areas after passing it through the heat exchanger and filters. The heat exchanger recovers up to 90% of heat from extracted air and transfers it to incoming fresh air.

Technical data

Power supply	Energy consumption (W - th - C)	Ventilation capacity (Rooms)	SRI remote control
Mono 230 V - 50 Hz	48	2 to 7	No ⁽¹⁾
Flange openings ø	Width (W)	Height (H)	Depth (D)
80/125	700	300	490

(1) PRIMOCOSY HR BP SRI model includes SRI remote control

Optimocosity HR PLUS

Dual-flow heat recovery ventilation system with remote control through a smartphone or a tablet

CONNECTIVITY

Connect and control your ventilation system remotely with the **Cozytouch application**

Cozytouch Bridge required

DUAL-FLOW VENTILATION

+ COMFORT

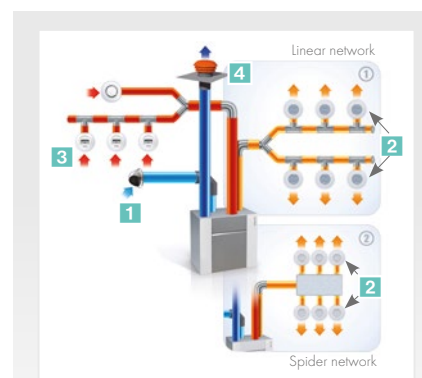

- Up to 91% recovery of energy from air
- Maximum return on heat recovery: High-performance heat exchanger
- Exclusive CO₂ Sensor for optimised indoor air quality: Ventilation flow rates adapt to the user's daily rhythm
- Reduced heating and cooling costs

+ EASY MAINTENANCE

- Atlantic's heat recovery ventilation systems extract stale, humid air from toilets, bathrooms and kitchens and replace it with warm, dry-filtered fresh air ducted into living areas
- Magnetic front cover for quick access
- Easy access to filters
- Sliding filters

+ ACOUSTIC AND THERMAL COMFORT

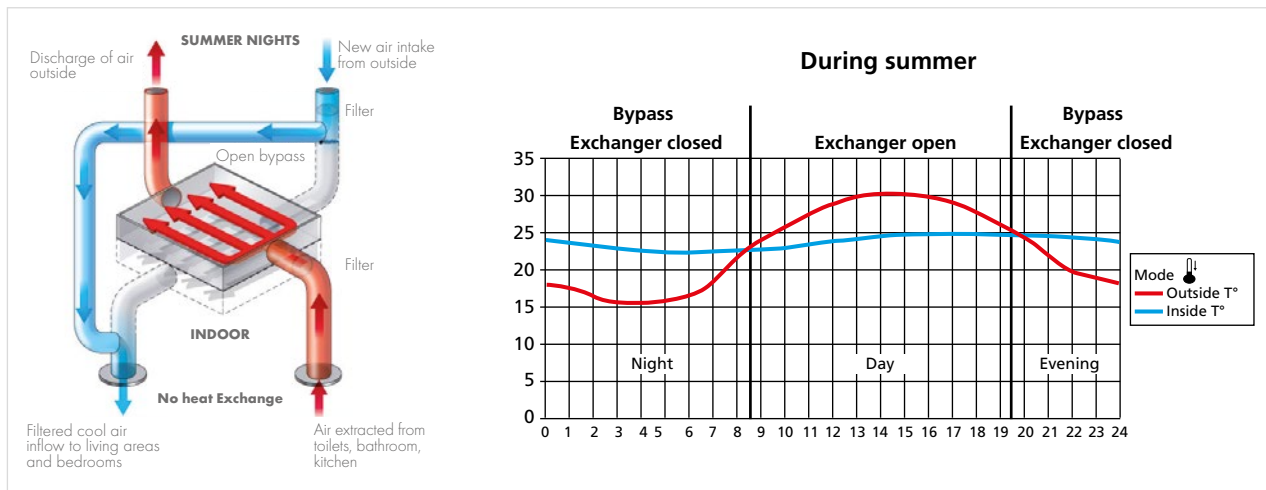

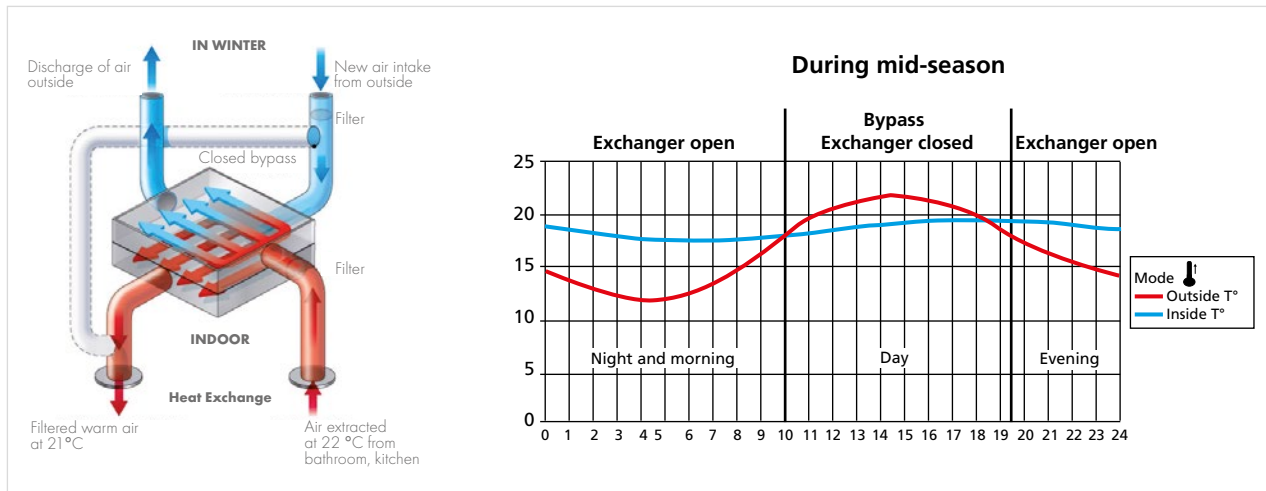

- Ideal solution to allergy problems
- High-efficiency filters (pollen, dust exhaust, soot)
- Fine filtration of incoming air
- Quiet operation with reinforced insulation
- Remote control of all functions

- 1 Outdoor air inlet
- 2 Air circulated in living room and bedrooms
- 3 Air extraction from bathroom, toilets, kitchen and laundry
- 4 Roof terminal air outlet

BYPASS PRINCIPLE

Technical data

Power supply	Number of bedrooms	Weight (Kg)	ø flange opening (mm)
Mono 230 V - 50 Hz	2 to 7	45	160

* Complies with eco-design regulation 1253/2014 and energy labelling regulation 1254/2014..

Aquacosy

Exhaust air heat pump water heater

HEAT PUMP WATER HEATER

MODEL 100 TO 200
(wall-mounted or tripod installation)

Wall-mounted

Tripod

CONNECTIVITY

Connect and control your heat pump water heater system remotely with the **Cozytouch application**

Cozytouch Bridge required

+ COMFORT AND RELIABILITY

- 2-in-1 solution for both ventilation and water heating
- Silent operation
- For low-energy or passive houses
- Model 100 for up to 3 people and model 200 for a household of up to 6 people

+ THERMAL PERFORMANCE

- Economic and ecological solution: recovery of heat from the extracted air

+ USER-FRIENDLINESS

- ACI hybrid system for optimal tank protection and long life
- Connected product for remote control
- Easy installation: Wall-mounted or on tripod (hydraulic connection under the water heater)
- Simplified maintenance: Washable and front-accessible filter

OPERATING PRINCIPLE

- 1 Fresh air enters through air intakes located above bedroom and living room windows
- 2 Exhaust air is extracted through extraction vents in the kitchen and the bathroom
- 3 This warm exhaust air (+/- 20°C) transfers its heat to the water heater
- 4 The cooled exhaust air escapes outdoors

Specifications
